

## Exercise 1 – Birthday Wishes (The Workshop Example)

### Learning Objective

Understand how adding context changes AI output.

### Basic Prompt

Write a birthday wish.

### Generate AI Output

*(Generate this using ChatGPT/Meta AI of Whatsapp or another AI tool.*

### Improved Prompt (AIM Framework)

**Act:** You are a close childhood friend.

**Input:** My friend Rahul is celebrating his 30th birthday. He has recently been promoted and has a great sense of humour.

**Mission:** Write a warm, cheerful birthday message in 3–4 lines that celebrates both his birthday and his recent promotion.

### Generate new AI Output

*(Compare this output with the one generated from the basic prompt.)*

### Reflection Questions

- What changed compared to the basic prompt?
- Which details made the output more personal?

## Exercise 2 – Birthday Wishes for Your Wife

### Learning Objective

Understand how adding **personal context** transforms a generic AI response into a heartfelt and meaningful message.

### Basic Prompt

Write a birthday wish for my wife.

### Generate AI Output

*(Generate this using ChatGPT/Meta AI of WhatsApp or another AI tool.*

### Improved Prompt (AIM Framework)

**Act**

You are a caring husband and an excellent writer who knows how to express love, gratitude, and appreciation through heartfelt words.

**Input**

My wife is celebrating her birthday today. She is loving, caring, charming, and the mother of our two children. She always takes wonderful care of our family and fills our home with happiness. I want her to feel special, appreciated, and deeply loved on her birthday.

### **Mission**

Write a heartfelt birthday message in **5–6 lines** that expresses my love, gratitude, and admiration. The message should be emotional, warm, and personal. End with a heartfelt blessing for her happiness, good health, and a beautiful future together.

### **Generate new AI Output**

*(Compare this output with the one generated from the basic prompt.)*

### **Reflection Questions**

1. Which message feels more personal and meaningful?
2. What additional information made the AI response more emotional?
3. Which part of the AIM framework contributed the most to the improved output?
4. If you were sending this message to your wife, which version would you choose and why?

## **Exercise 3 – Birthday Wishes for Your Husband**

### **Learning Objective**

Learn how providing **relationship details, personality traits, and emotional context** enables AI to generate a deeply meaningful and personalized birthday message.

### **Basic Prompt**

Write a birthday wish for my husband.

### **Generate AI Output**

*(Generate this using ChatGPT/Meta AI of Whatsapp or another AI tool.*

### **Improved Prompt (AIM Framework)**

#### **Act**

You are a loving wife and an excellent writer who knows how to express love, admiration, gratitude, and appreciation through heartfelt words.

#### **Input**

Today is my husband's birthday. He is a loving and responsible husband who takes great care of our family. He works tirelessly and handles enormous pressure at his workplace, yet he never lets his family feel the burden of his stress. He is trustworthy, possesses high moral values and ethics, and always inspires us through his honesty, dedication, and selfless nature. I feel proud and grateful to have him as my life partner.

### **Mission**

Write a heartfelt birthday message in **5–6 lines** expressing my love, gratitude, admiration, and respect for him. The message should be warm, emotional, and inspiring. Appreciate his sacrifices, acknowledge his strength and values, and conclude with heartfelt wishes for his happiness, good health, success, and a long life filled with peace and joy.

### **Generate new AI Output**

*(Compare this output with the one generated from the basic prompt.)*

### **Reflection Questions**

1. Which version better reflects your husband's personality?
2. Which details made the message more emotional and authentic?
3. How did adding context improve the quality of the AI-generated response?
4. If you were sending this message to your husband, which version would you choose and why?

## **Exercise 4 – Birthday Wishes for Your Sister's Son (Nephew)**

### **Learning Objective**

Learn how adding **personal background, achievements, ambitions, and personality traits** enables AI to create a motivational and meaningful birthday message.

### **Basic Prompt**

Write a birthday wish for my nephew.

### **Generate AI Output**

*(Generate this using ChatGPT/Meta AI of Whatsapp or another AI tool.)*

### **Improved Prompt (AIM Framework)**

#### **Act**

You are a loving uncle and a thoughtful writer who knows how to motivate and inspire young professionals through meaningful words.

## Input

Today is my sister's son's birthday. He has completed his Mechanical Engineering and is currently working in Germany. He is highly ambitious, determined, hardworking, kind-hearted, and spiritually grounded. He has always believed in continuous learning and is committed to achieving his dreams through honesty and perseverance. I want my message to appreciate his journey so far, encourage him to continue growing professionally and personally, and remind him to stay humble and connected to his values.

## Mission

Write a heartfelt birthday message in **5–6 lines** that is warm, inspiring, and motivating. Appreciate his dedication, acknowledge his achievements, encourage him to pursue his dreams with confidence, and conclude with blessings for good health, happiness, success, and a meaningful life.

## Generate new AI Output

*(Compare this output with the one generated from the basic prompt.)*

## Reflection Questions

1. Which message sounds more personal and inspiring?
2. Which details about your nephew helped AI generate a better response?
3. How did his career, personality, and values influence the tone of the message?
4. If you were sending this birthday wish, which version would you choose and why?

## Exercise 5 – Draft an Email to Console a Friend After an Argument

### Learning Objective

Learn how the **AIM (Act, Input, Mission)** framework helps AI generate a thoughtful, empathetic, and well-structured email by providing sufficient context about the people and the situation.

---

### Basic Prompt

Draft an email to my friend who had an argument with his wife.

---

### Generate AI Output

*(Generate this using ChatGPT/Meta AI of Whatsapp or another AI tool.)*

## Improved Prompt (AIM Framework)

### Act

You are a mature, empathetic, and emotionally intelligent friend who writes thoughtful and supportive emails.

### Input

One of my closest friends recently had an argument with his wife. He is short-tempered by nature but is a kind-hearted and caring person. The disagreement was about simple household habits, such as keeping towels, wallets, and other personal belongings in their proper places and maintaining cleanliness at home. His wife is a loving housewife who sincerely cares for the family and works hard to keep the house neat, organized, and peaceful. She reminds him about these habits because she values cleanliness and wants a well-managed home. Unfortunately, these arguments often take place in front of their children, creating unnecessary stress within the family.

I want to send my friend an email that comforts him, helps him understand his wife's perspective, and gently encourages him to remain calm and work towards a peaceful solution. The email should not blame either person but should promote mutual respect, communication, and family harmony.

### Mission

Draft a warm and supportive email of **approximately 150 words**. The tone should be caring, encouraging, and respectful. Avoid taking sides or sounding judgmental. Encourage patience, understanding, and appreciation for each other's efforts. Conclude the email with a positive message reminding him that small changes in daily habits and calm communication can strengthen relationships and create a happier home for both the couple and their children.

### Generate new AI Output

*(Compare this output with the one generated from the basic prompt.)*

---

### Reflection Questions

1. Which email would genuinely comfort your friend?
2. How did the additional context improve the quality and empathy of the response?
3. Which AIM element had the greatest impact on the final email?
4. Why is it important to describe the personalities and intentions of **both** people involved rather than only one side?

## Exercise 6 – Drafting a Professional Vendor Communication

### Learning Objective

Learn how the **AIM (Act, Input, Mission)** framework helps AI draft professional business emails that are clear, respectful, action-oriented, and relationship-focused.

### Basic Prompt

Write an email to a vendor asking him to deliver the material immediately because production is going to stop.

### Generate AI Output

*(Generate this using ChatGPT/Meta AI of Whatsapp or another AI tool.*

### Improved Prompt (AIM Framework)

#### **Act**

You are an experienced **Procurement Manager** at a manufacturing company with excellent business communication and negotiation skills.

#### **Input**

Our company, Silver Engineering, had placed an order for **500 precision bearings** required for production. The supplier committed to deliver the material on **Monday**, but today is **Thursday**, and the shipment has still not arrived. If the material is not received by **tomorrow morning**, our production line may stop, customer deliveries may be delayed, and the company could suffer financial losses.

The supplier has been our long-term business partner, and we value this relationship. Therefore, I want to communicate the urgency firmly but professionally, without damaging our business relationship.

The email should encourage the supplier to take immediate action and provide a confirmed delivery schedule.

#### **Mission**

Draft a **professional business email of approximately 150–180 words**.

The email should:

- Clearly explain the seriousness of the situation.
- Mention the impact on production.
- Request immediate dispatch of the material.
- Ask for a confirmed delivery schedule.
- Maintain a respectful and professional tone.

- Preserve the long-term business relationship.
- End with a positive note expressing confidence in the supplier's support.

### **Generate new AI Output**

*(Compare this output with the one generated from the basic prompt.)*

### **Reflection Questions**

1. Which email sounds more professional and business-oriented?
2. How did the additional context improve the AI-generated response?
3. Which AIM element had the greatest influence on the final email?
4. Why is it important to explain the business impact rather than simply demanding immediate delivery?
5. How does the improved prompt help maintain a long-term business relationship while communicating urgency?

## **Exercise 7 – From AIM to RCTCF**

### **Learning Objective**

Understand the limitations of the **AIM framework** and learn how the **RCTCF framework** provides greater control over AI-generated responses by introducing **Constraints** and **Format**.

#### **Step 1 – Review the AIM Prompt**

Review the prompt of the previous exercise.

#### **Step 2 – Identify the Gaps**

| AIM         | Missing Information |
|-------------|---------------------|
| Act         | ✓                   |
| Input       | ✓                   |
| Mission     | ✓                   |
| Constraints | ✗                   |
| Format      | ✗                   |

The gaps are as below:

- No word limit
- Type of tone if strict or polite?
- Needs bullet points?
- Subject Line?

#### **Step 3 – Improved Prompt**

**Role**

You are an experienced Procurement Manager with excellent negotiation and business communication skills.

### **Context**

Silver Engineering placed an order for 500 precision bearings.

Delivery was committed on Monday.

Today is Thursday.

Production may stop tomorrow.

Customer deliveries may be affected.

The supplier is our long-term business partner.

### **Task**

Write a professional email requesting immediate dispatch and a confirmed delivery schedule.

### **Constraints**

- Maximum 180 words.
- Professional but firm tone.
- Do not threaten the supplier.
- Do not blame individuals.
- Maintain long-term business relationship.
- Request confirmation before 4 PM today.

### **Format**

Generate

- Subject
- Greeting
- Email Body
- Closing
- Signature

## **Reflection Questions**

1. Which prompt gave you greater control over AI?
2. What difference did Constraints make?
3. Why is Format important?
4. Could you use RCTCF for SOPs?
  - a. Meeting Minutes?
  - b. Presentations?

## Exercise 8 – Converting Rough Meeting Notes into Professional Minutes of Meeting (MOM)

### Learning Objective

Understand why the **AIM framework** is sufficient for simple communication tasks but may not produce consistent professional documents. Learn how the **RCTCF (Role, Context, Task, Constraints, Format)** framework provides greater control, consistency, and professionalism when generating structured business documents.

### Scenario

You attended a weekly production review meeting. During the meeting, you quickly noted down a few important points in your notebook. Your manager has asked you to prepare a professional **Minutes of Meeting (MOM)** and circulate it to all participants.

### Rough Meeting Notes

Production Review Meeting

Date : 15 July 2026

Participants :

Plant Head

Production Manager

Quality Manager

Maintenance Manager

Purchase Manager

Discussion

- Production target achieved only 85%.
- Bearing shortage affected production.
- Vendor promised dispatch by tomorrow.
- Maintenance reported two hours of machine downtime.
- Quality found higher rejection in Line-2.
- Customer audit next Monday.
- SOP revision required for Assembly Section.

- Training on AI planned next week.

## Actions

Purchase : Follow vendor.

Maintenance : Complete preventive maintenance.

Quality : Investigate rejection.

Production : Improve daily planning.

HR : Arrange AI training.

## Prompt (RCTCF Framework)

### Role

You are an experienced Executive Assistant responsible for preparing professional Minutes of Meeting for senior management.

### Context

The following are rough notes taken during a weekly production review meeting at Silver Engineering. The notes are incomplete and written only for personal reference. They need to be converted into a clear, professional MOM that can be shared with all meeting participants.

*(Paste the rough meeting notes here.)*

### Task

Prepare a professional **Minutes of Meeting (MOM)** based on the provided notes.

### Constraints

- Do **not** invent any discussion points or decisions that are not mentioned.
- Keep the document within **one page**.
- Use clear, concise, and professional business language.
- Preserve the sequence of discussion.
- Highlight action items clearly.
- If any information is missing (such as due dates), indicate **"To be decided"** instead of assuming values.

### Format

Prepare the MOM using the following structure:

- Meeting Title
- Date
- Participants

- Objective of the Meeting
- Key Discussion Points
- Decisions Taken
- Action Items (Table with Responsibility and Due Date)
- Next Meeting (if applicable)

### **Reflection Questions**

1. What information might have missed when only the AIM framework was used?
2. How did **Constraints** improve the reliability of the AI-generated document?
3. How did specifying the **Format** improve readability and consistency?
4. In your opinion, which framework would you choose for preparing official business documents? Why?
